TP-Link Archer C86

AC1900 Dual Band | Mesh / Catalog

Independent reference document, not an official TP-Link publication. Hardware/region variants may differ. Check the label on your device.

Archer C86 | AC1900 Dual Band | Mesh

A dual-band wireless router for home networks, combining high-speed Wi-Fi, Gigabit wired connections and EasyMesh-compatible expansion.

Performance highlights

Up to 1300 Mbps on 5 GHz and 600 Mbps on 2.4 GHz (theoretical link rates). MU-MIMO helps serve multiple compatible devices.

Network expansion

EasyMesh-compatible networking enables compatible devices to form a broader Wi-Fi network. Confirm firmware and device compatibility.

Convenience

Setup and network management through TP-Link Tether; multiple Gigabit Ethernet connections.
