BESI

- **2 Extended cigarette lighter sockets:** Used for plugging in specialized peripheral devices.
- **2 USB ports:** Used for charging phones and tablets.

⚡ **HIGH POWER 80W - HANDLES EVERY DEVICE:** Two extended cigarette lighter sockets support high power (up to 80W), allowing you to comfortably use high-power devices such as: mini refrigerators in cars, handheld vacuum cleaners, electric tire pumps, or dashcams without worrying about overload or power failure.

📱 **Dual USB 3.1A Fast Charging:** Two USB ports support a total current of up to 3.1A, enabling fast charging for mobile devices. The intelligent chip automatically distributes the current appropriately, ensuring stable charging even when charging two devices simultaneously.

💎 **METAL DESIGN - DURABLE & ELEGANT:** The exterior is made from high-quality metal and heat-resistant ABS plastic. This not only gives the car's interior a modern look but also helps dissipate heat better, ensuring safety during long-term use.

⚙️ **KEY FEATURES** ⚙️

🛡️ **Shock-resistant clamp:** The sturdy spring-loaded clamp design on both sides ensures the cigarette lighter stays firmly in place at the socket, maintaining a continuous power supply even on bumpy roads.

🌍 **12V-24V Compatible:** Works well with most current vehicle types, from passenger cars (Sedans, SUVs) to trucks and buses.

🧠 **Safety Protection Chip:** Integrated protection circuit against overcurrent, overvoltage, short circuit, and overheating, providing absolute safety protection for your vehicle's electrical system and equipment.

Dual USB ports expansion dual cigarette lighter ports

Large power of 100W

The four ports can charge at the same time and connect with various devices, including mobile phones and dash cams

BESI

Note: The power of the device connected to the cigarette lighter port cannot exceed 80W.

Separate charging makes it safe and anti-overloading
The separation of the USB ports and cigarette lighter ports prevents the danger caused by overloading. Also, it is convenient in terms of storage.
Integrated charging
It is liable to overloading, so there are hidden safety hazards. Also difficult to store.
